

MARCH 2020 LEVY FOR LEARNING

On March 17th, we will have a 7.99 mill operating levy on the ballot. West Clermont School District's most vital need is **stabilization to protect and continue** the current level of programs and services.

Passage of this levy will help fund **day-to-day operations** of our schools—such as staffing, utilities, supplies & K-8 busing.

This operating levy would cost **\$23.30 a month** per \$100,000 appraised home.

We have not passed a **new local operating levy since 2004** & state funding shows minimal growth.

We operate a lean budget. Our per student spending ranks in the **lowest 3%** of all Ohio public school districts.

We spend **\$24 million less** than the state average per year. Our students cannot afford any more cuts to their experience in our schools.

IF IT PASSES

This levy will allow us to:

Continue our educational programs, services and class size targets

Provide learning experiences that will **prepare students for their future**

Provide needed support for **school operations**

IF IT FAILS

Without the funding from this levy:

We will make **\$3.5 million in cuts** and return to the ballot.

These cuts will have a direct impact on our students, classrooms & community.
